TECHNICAL EXPERIENCE

Patense.ai

- **Developed and launched Patense.ai**, a patent prosecution tool designed to help lawyers analyze office actions, utilizing **Next.js, tRPC, Prisma, Tailwind, and AWS Lambda**.
- **Implemented AI-driven functionality** with OpenAI LLMs to extract and search for inventive features from patent specifications, reducing attorney time significantly.
- **Optimized data processing** through recursive feature extraction using a custom $O(\log(n))$ algorithm, enhancing the system's scalability for large document searches.
- **Integrated vector databases** to efficiently query and retrieve relevant patent references, improving search precision and performance.
- **Engineered the application structure** with AWS Lambda for serverless computing, Stripe for payments, and Clerk for authentication, ensuring robust and secure user management.
- **Designed a user-friendly interface** allowing users to either automate the extraction of inventive elements and conduct high-precision searches, leveraging prompt engineering and regex for accurate results.
- **Automated lead generation and outreach** with python, beautifulsoup, selenium and crontab generating 70 weekly new visitors

Liftr.club

- **Developed a comprehensive bodybuilding coaching app** using Next.js, React, TypeScript, tRPC, Prisma, Tailwind CSS, enabling users to create, plan, edit, and log workouts.
- **Implemented a sophisticated progression** that tracks workout performance week-to-week, programming progressive overload and adjustments based on biofeedback.
- **Designed authentication** with Nostr public/private key sign in and session management.
- **Engineered user-friendly features** for workout management, including customizable plans, target weight and rep displays, and intuitive add/remove functionalities for sets, exercises, and workouts.
